Highly Effective, Ultra Slim Warning Light

The MicroPulse® Ultra models have a low-profile design that offers a wider range of mounting options to fit various applications. The advanced high-output LED light head can be programmed to operate as a single unit or in synchronization with multiple light heads. Built-in flash patterns enable multiple vehicle perimeter lights to be either synchronized in the same pattern or in opposite sequence.

Built to Stand Up to the Most Punishing Conditions

The MicroPulse® Ultra lens is made of US resistant polycarbonate to protect against harsh conditions. Models include a fully encapsulated water-proof housing, which provides a barrier against moisture and condensation. All MicroPulse Ultra perimeter lights are backed by Federal Signal's five-year warranty.

A Versatile Solution for any Warning Light Application

Suitable for external and/or internal mounting applications, the MicroPulse Ultra comes in many colors, including Amber, Blue, Green, Red and White, in single-, dual-, and tri-color combinations. Models come standard with a Black bezel and are also available with an optional Chrome or White bezel.

FSJoin_™ Compatible

MicroPulse Ultra models are FSJoin compatible. FSJoin is a programming compatibility feature of Federal Signal's light bars and exterior/interior warning lights that work in conjunction with the Pathfinder light/siren controller. The combination of FSJoin warning lights and the Pathfinder siren allows the Pathfinder to control lights around the vehicle by utilizing flash patterns in the siren, syncing/alternating light heads, and dimming light heads. FSJoin compatible products can be programmed through the Convergence Network Configuration Software, simplifying the programming of multiple warning lights and light bars.

Compatibility with Older MicroPulse Ultra Models

- New MicroPulse Ultra models will not synchronize with older MicroPulse Ultra models.
- New MicroPulse Ultra models will synchronize with existing X Series models. This includes MicroPulse Ultra X Series, MicroPulse Wide Angle X Series, 416300 X Series, and 416900/416910 X Series models

Wiring Diagram

FSLink products feature (5) programming wires. Wire functions are consistent across all FSLink products allowing for ease of programming.

FSLink Compatible

MicroPulse Ultra models feature FSLink, a built-in software technology that incorporates a shared set of flash patterns within Federal Signal's LED perimeter lights, interior lights, and beacons. This shared flash pattern software allows the various products to be wired together, set in a common pattern and then synchronized together to flash simultaneously or alternately.

Wire	Internal Flasher Mode	
Red	To +Vdc for Mode 1	
White	To +Vdc for Mode 2	
Brown	To +Vdc for Mode 3	
Green	+Vdc for programming sync/FSLink	
Black	To Chassis Ground	

Programming Features
